The Evolution of Pillar 4:
Ensure Students Are Learning

Updated Definition

- Scaled high-quality, program-relevant, applied learning experiences
- Intentional and sustained student engagement
- Evidence-based, high-impact teaching practices across modalities
- Institution-wide commitment to equity-minded, asset-based teaching improvement
- Quality assessment of program learning outcomes that lead to credentials, further education, and/or gainful employment

Hands-on Activity for Exploring Privilege and Oppression

Innovative Teaching Practice Description:

To get students to think critically about privilege and oppression, the instructor asks students to review five clues about an oppressed group and to write down guesses about the identity of the group on a sheet of paper. For example, the instructor provides these clues:

1. There are people who are part of this group who are still forcibly converted to the dominant students are all members of the (still unidentified) oppressed group. The instructor then asks the left-handed students to write their name on the board; at this point, most students are able to identify the nature of the oppressed group.

Next, the instructor walks the students through the five clues and explains how these relate to left-handed people specifically. Right-handed students are then asked to brainstorm ways in which left-handed
• There are people who are part of this group who are still forcibly converted to the dominant group.

• In American history, there was a time when people in this group were considered mentally ill.

• Stereotypes of this group include that these individuals are clumsy.

• If you were a member of this group during the Salem witch trials, this would have been proof that you were a witch.

2. What do you feel you bring to your role as a community college instructor? What makes you an effective teacher (e.g., knowledge/experience in your field, good teaching skills, ability to relate well with students, other)?

3. What kind of professional development opportunities does your college provide to help faculty develop more effective teaching and learning strategies?
   - How do you work with other faculty at your college to support improvement in teaching practices? What about part-time faculty?
   - Can you describe a time when you’ve shared teaching strategies with colleagues? Or when you have successfully implemented a strategy you learned from a colleague?
   - When you first started teaching at this college, were you assigned a faculty mentor? Have you served as a mentor?
   - What do you do on your own to stay abreast of engaging and effective teaching practices?
   - What are some of the incentives offered for faculty who engage in professional development opportunities and/or undertake this type of teaching? (Intrinsically motivated rewards?)
Engaging Faculty With Teaching and Learning:
An Agenda

Agenda
<Insert Date>
9:00 a.m.–11:00 a.m.

9:00 a.m. Welcome and Introductions

Overview of Objectives:
- Define Guided Pathways
- Define Ensure Students Are Learning in a Guided Pathways Framework
- Provide Resources and Tools for Ensure Students Are Learning

9:15 a.m. What is Guided Pathways? What is Ensure Students Are Learning in a Guided Pathways Framework?

Notes for Facilitator:

What is Guided Pathways?
Creating guided pathways requires managing and sustaining large-scale transformational change. The work begins with thorough planning, continues through consistent implementation, and depends on ongoing evaluation. The goals are to improve rates of college completion, transfer, and attainment of jobs with value in the labor market—and to achieve equity in those outcomes.

What is Ensure Students Are Learning in a Guided Pathways Framework?
Ensuring students are learning in a guided pathways framework means using program-level outcomes, culturally responsive teaching practices, and high-quality assessment to promote student learning inside and outside the classroom.
Faculty Learning Community: Sample Activity

This activity is designed for a community of part- and full-time faculty learners interested in teaching and learning within a guided pathways framework. The learning community should be composed of faculty members teaching in the same discipline.

This is a multi-step activity that will take place over three weeks. There will be two in-person group meetings, along with individual work in between the two face-to-face meetings. For the face-to-face meetings, there should be a moderator present who is familiar with the work of guided pathways and the Center for Community College Student Engagement’s Ensure Students Are Learning website.

All time frames are suggestions. Actual times are up to the moderator’s discretion based on the size of the faculty learning community. The moderator should also build in appropriate break times for the face-to-face sessions.

The goals of the activity are for the members of the learning community to

- gain a better understanding of teaching and learning within a guided pathways framework,
- review and use the Narratives Search tool on the Ensure Students Are Learning website,
- develop a teaching practice to use in one of their courses based on one of the practices described in the narratives, and
- share their insights and ideas with fellow members of the learning community.

Week One, Group Session (one day)

Step One:

The moderator should lead the members of the learning community through a review of the Ensure Students Are Learning website and facilitate a discussion about what guided pathways is and what teaching and learning means within a guided pathways framework.

The landing page of the Ensure Students Are Learning website includes a comprehensive overview of guided pathways and how instruction fits within it. A visual “placemat” of the guided pathways implementation process is also available on this page and can be downloaded, printed, and distributed to the learning community members.

CCSSE Faculty Predictions Exercise – Guided Pathways

The following are items from the Community College Survey of Student Engagement (CCSSE) that are aligned with the “Ensure Students are Learning” component of the Pathways Model. We invite you to predict the responses our students gave on these select items. Results from this exercise can be compared against our CCSSE results. The alignments and gaps between student responses and faculty responses can help facilitate important discussions.

Teaching & Learning Within a Guided Pathways Framework

Team Time

February 12, 2021

1. Select a question for the group to discuss.
   - How are we making all faculty members (full-time and part-time) aware that we are implementing guided pathways?
   - What kind of professional development opportunities for teaching within a guided pathways framework are we offering our faculty? What opportunities are we not offering?
   - How are we supporting our faculty to have time and opportunity to interact with and learn from one another, especially with student services staff?

2. What are some strategies that might improve this area?
Teaching & Learning Within a Guided Pathways Framework
